PROFESSIONAL SUMMARY

Security Engineer with 10+ years of experience across security engineering, software development, cyber threat intelligence, and security assessments for critical infrastructure and enterprise systems. Blend hands-on experience in threat modeling, vulnerability assessments, incident response, secure coding, malware analysis, and technical security reviews with current graduate study in Computer Science focused on AI-enabled systems. Experienced in protecting high-value data, analyzing complex systems for vulnerabilities, and partnering with cross-functional stakeholders to improve access controls, data protection, and enterprise security guardrails for modern production environments.

EXPERIENCE

Administrative Officer (Cyber Threat Intelligence), Threat Management Division

Jan 2022 – Present

Ministry of Science and ICT

Sejong, Republic of Korea

- Delivered 500+ public cyber threat intelligence (CTI) cases per year to central government agencies by leading malware analysis, attack-evidence collection, and technical reporting on international hacking groups for incident response and remediation.

Administrative Officer (Security Engineering), Security Planning Division

May 2018 – Jan 2022

Ministry of Science and ICT

Sejong, Republic of Korea

- Delivered penetration testing, red teaming, and cyber security consulting for remediation to 50+ public institutions annually (200+ total) in Korea, and conducted AI-assisted technical security assessments and vulnerability analysis for critical infrastructure networks and software supporting nuclear and thermal power, railway control, and power systems.

Software Developer, Reactor Design Development Division

Nov 2014 – Mar 2018

KEPCO E&C

Gimcheon, Republic of Korea

- Developed reactor design software for nuclear power plants and designed and built an engineering database for plant design workflows over 3+ years, while performing vulnerability assessments and secure coding remediation for critical information and communications infrastructure including reactor software and engineering databases.

SKILLS

Programming	Python, Java, Spring MVC, C/C++, C#, JavaScript, SQL, Database Development, HTML/CSS
Security	Security Engineering, Technical Security Assessments, Threat Modeling, Vulnerability Assessments, Malware Analysis, Incident Response, Penetration Testing, Red Teaming, Access Controls, and Data Protection
AI/ML	Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), ML Infrastructure, Model Evaluation, Model Optimization, and Data Processing
Tools	PyTorch, TensorFlow, Scikit-learn, NumPy, pandas, Git, Linux, Open-Source Software (OSS), and Cloud-Based Production Tech Stacks
Languages	Korean (Native), English (Fluent), Japanese (Intermediate)

EDUCATION

Master of Science in Computer Science, University of California, Davis

Expected Jun 2027

Korean Government Long-term Fellowship for Overseas Study, Ministry of Science and ICT

Bachelor of Science in Computer Software, Kwangwoon University

Feb 2015

CERTIFICATIONS & TRAINING

Locked Shields, NATO CCDCOE (2023) Advanced Web Application Exploits, Black Hat Training USA (2021) SQL Developer, Korea Data Agency (2014) Engineer Information Processing, HRDK (2013)
